---

## SUMMARY

Backend Engineer with hands-on experience developing robust, scalable RESTful APIs using **Spring Boot (Java)** and **ASP.NET Core (C#)**, and integrating them to manage core business logic and handle high-concurrency requests. Proven ability to build full-stack solutions, specializing in cross-platform **Mobile Development (Flutter/Dart)** for high-performance UI/UX and real-time data synchronization. Proficient in JWT security, ORM (EF Core, JPA/Hibernate), and modern software architectures.

## EDUCATION

**B.Tech Computer Science & Engineering**

CGPA: 7.45 | Amity University, Noida

*Expected June 2026*

## SKILLS

- **Programming Languages:** Java, Dart, C#
- **Backend Frameworks:** Spring Boot, ASP.NET Core
- **Frontend Frameworks:** Flutter
- **Tools & Concepts:** Docker, Git, RESTful APIs, Linux

## EXPERIENCE

**Software Engineer Intern (Flutter) – UXDLAB Software**

**March 2026 – Present**

- Developing and maintaining production-grade cross-platform applications using **Flutter**, ensuring feature stability and high-quality UI/UX standards.
- Analyzing and navigating complex **existing codebases** to implement feature enhancements and resolve technical debt within established architectures.
- Strengthening team dynamics by coordinating across functional units, gaining hands-on experience in **collaborative development** and professional life cycles.

## PROJECTS

**Implementation of Subscription management Backend Using ASP.NET (ASP.NET)**

*May 2026*

- Engineered a **RESTful API** using **ASP.NET Core** and **C#**, implementing **JWT security** and **Entity Framework Core (EF Core)** for data persistence.
- Undertook this project as a dedicated learning initiative to master ASP.NET Core, C#, and Entity Framework Core, successfully implementing user authentication, subscription data, and payment processing functionalities.
- Configured and deployed the API to a production-like environment using **Docker containers** for consistent and scalable deployment.

**Premio – Subscription Management Mobile App** (Flutter)

**January 2026**

- Developed a cross-platform mobile application using **Flutter and Dart** to centralize and monitor recurring expenses with high-performance UI. Implemented **State Management** and local caching for real-time data synchronization.
- Designed a premium user experience with **custom animations**, glassmorphism UI, and integrated secure API consumption layers for complex asynchronous data streams.
- Integrated with the **Spring Boot backend API** to ensure secure and efficient exchange of subscription data and user credentials.

**Premio – Subscription Management Backend** (Spring Boot)

**January 2026**

- Developed a robust **RESTful backend** using **Spring Boot and Java** to handle high-concurrency requests and manage core business logic.
- Implemented **JWT-based security** with Spring Security, utilized **JPA/Hibernate** for optimized ORM, and architected automated background services for **billing reminders**.
- Designed and implemented a robust data model in **PostgreSQL** to efficiently store and query user, subscription, and payment history records.
